

# ALBIN JIJI

Senior Frontend Engineer | React.js | Next.js | TypeScript | Performance Optimization

Kochi, India | [albinjiji8@gmail.com](mailto:albinjiji8@gmail.com) | +91 9207603364 | [LinkedIn](#) | [GitHub](#) | [Personal Website](#)

---

## SUMMARY

Frontend Engineer with 4+ years in React.js, Next.js, and TypeScript. Builds scalable, reusable UI components and owns features end-to-end — 80% UI code reusability, 2x faster feature delivery. Shipped a product solo from 0 to 1, live with real users. Experienced working async-first with distributed, cross-timezone teams. Uses Cursor and Claude Code daily as part of a modern, AI-native workflow. Focused on performance, code quality, and long-term maintainability.

## TECHNICAL SKILLS

- **Frontend:** React.js, Next.js (App Router, SSR, SSG), TypeScript, JavaScript (ES6+), HTML5, CSS3, React Router
- **State:** Redux, Redux Toolkit, RTK Query, Zustand
- **Styling & UI:** Tailwind CSS, Material UI, Styled Components, Bootstrap, Framer Motion, Figma
- **Tooling:** Webpack, Babel, Git, ESLint, Chrome DevTools, CI/CD, Azure, Vercel
- **Testing:** Jest, React Testing Library
- **Performance:** Lighthouse, Core Web Vitals, Bundle Analysis, Code Splitting, Re-render Profiling
- **Backend & Database:** Node.js (basic), Python (basic), Supabase (Auth, RLS, Postgres), PostgreSQL, RESTful APIs
- **AI Tools:** Cursor, Claude, Claude Code

## EXPERIENCE

### Senior Software Engineer – Kalkitech

April 2022 – Present

- Built and owned a reusable React component library from the ground up — the design foundation and single source of truth across the product, achieving 80% UI code reusability and 2x faster feature delivery. Defined the component architecture and coding standards other engineers built against.
- Owned frontend features end-to-end, from architecture and design through deployment — making independent decisions on component structure, state management, and performance with minimal supervision.
- Engineered a unified WebView application for Android and iOS from a single React.js codebase — delivering 50% cost efficiency and accelerated release velocity.
- Optimized application performance and cross-browser compatibility by splitting large components, reducing re-renders, eliminating overused useEffect hooks, and optimizing API calls — cutting initial load time by 30%.
- Integrated 20+ RESTful API endpoints via a unified service layer using RTK Query — enabling sub-second data retrieval, intelligent caching, and consistent error handling.
- Managed application state using Redux and Redux Toolkit — reducing boilerplate by 40% while ensuring predictable, synchronized data flow across complex modules.
- Collaborated with designers to translate Figma designs into production UI, using Framer Motion for polished micro-interactions.
- Worked async-first with a US-based client across a significant timezone gap — writing self-contained documentation and making independent technical calls without waiting for real-time approval.
- Mentored junior developers and led code reviews — establishing team standards that cut PR rework by 50% and debugging time by 30%.
- Achieved 80% test coverage with Jest and React Testing Library, reducing post-release defects by 30%.

## PROJECTS

### Field Service Platform - 0 to 1, shipped solo, live with real users

Next.js · TypeScript · Tailwind CSS · Supabase (Auth, RLS, Postgres)

- Built a live field service platform end-to-end — architecture, auth, database, and UI — solo, in production with active users.

## InsightCoder — AI-Powered Developer Workspace

[GitHub](#)[Live](#)

Next.js • TypeScript • Redux Toolkit • Gemini API • Supabase • Monaco Editor

- AI coding workspace with 6 modes (Debug, Explain, Review, Tests, Chat, Repo Q&A), integrating an LLM API with streaming responses. Supabase auth with OAuth 2.0 and RLS, deployed on Vercel.

## Personal Portfolio

[GitHub](#)[Live](#)

Next.js • TypeScript • Tailwind CSS

- AI coding workspace with 6 modes (Debug, Explain, Review, Tests, Chat, Repo Q&A), integrating an LLM API with streaming responses. Supabase auth with OAuth 2.0 and RLS, deployed on Vercel.

## EDUCATION

---

### Master of Computer Applications (MCA)

August 2019 – July 2021

- A P J Abdul Kalam Technological University

### Bachelor of Computer Applications (BCA)

August 2016 – March 2019

- Calicut University
