ALBIN JIJI

Senior Frontend Engineer | React.js | TypeScript | Next.js | Performance
Kochi, India | albinjiji3@gmail.com | +91 9207603364 | LinkedIn | GitHub | Personal_Website

SUMMARY

Frontend Engineer with 4+ years building production React.js, Next.js and TypeScript applications. Built a reusable component library (80% UI code reusability, 2x faster feature delivery) and shipped a Next.js product solo from 0 to 1, live with real users. Uses Cursor, Claude Code and GitHub Copilot daily.

TECHNICAL SKILLS

- **Frontend:** React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Next.js, React Router
- **State & APIs:** Redux Toolkit, Redux, RTK Query, Zustand, Context API, RESTful API integration
- **Testing & Tooling:** Jest, React Testing Library, Playwright, Git, Webpack, Babel, ESLint, CI/CD, Azure, Vercel
- **Styling & UI:** Tailwind CSS, Material UI, Styled Components, Framer Motion, Figma
- **Performance:** Lighthouse, Core Web Vitals, Bundle Analysis, Code Splitting, Re-render Profiling
- **Process & AI Tools:** Agile/Scrum, Code Reviews, Cursor, Claude Code, GitHub Copilot

EXPERIENCE

Senior Software Engineer – Kalkitech | Aluva, Kerala **April 2022 – Present**

- Owned frontend modules end-to-end in an Agile/Scrum team, from design and architecture through testing, release and production support, delivering in sprints.
- Built a reusable React component library from scratch, now the UI foundation across the product: 80% UI code reusability and 2x faster feature delivery.
- Extracted shared custom hooks across modules, adding a further 40% reusability gain on top of the component library.
- Integrated 20+ RESTful API endpoints through a unified RTK Query service layer; managed state with Redux Toolkit, cutting boilerplate by 40%.
- Achieved 80% test coverage with Jest and React Testing Library, reducing post-release defects by 30%.
- Cut initial load time by 30% through profiling with React DevTools and Lighthouse: splitting large components, reducing re-renders, removing unnecessary useEffect hooks and optimizing API calls.
- Mentored junior developers and led code reviews, cutting PR rework by 50% and debugging time by 30%.

PROJECTS

Field Service Platform - *0 to 1, shipped solo, live with real users*
Next.js· TypeScript · Tailwind CSS · Supabase(Auth, RLS, Postgres)

- Built a live field service platform end-to-end — architecture, auth, database, and UI — solo, in production with active users.

InsightCoder — AI-Powered Developer Workspace **GitHub** **Live**
Next.js· TypeScript · Redux Toolkit · Google Gemini · Supabase · Monaco Editor

- Built a full-featured AI coding workspace with 6 specialized modes (Debug, Explain, Review, Tests, Chat, Repo Q&A). Implemented Supabase auth (OAuth 2.0 + Row-Level Security) with cloud persistence and RTK Query for async state management, deployed on Vercel.

OPEN SOURCE

Contributor, MUI (Material-UI) | github.com/mui/material-ui/pull/49729 | Merged

- Fixed a bug causing duplicate DOM ids and ambiguous aria-controls when multiple SpeedDial components share an ariaLabel; implemented with React's useId, added regression tests, and updated types, docs and the v10 migration guide.

EDUCATION

Master of Computer Applications (MCA) **August 2019 – July 2021**

- A P J Abdul Kalam Technological University

Bachelor of Computer Applications (BCA) **August 2016 – March 2019**

- Calicut University
